WiFi Connectivity	MiMo WiFi connectivity supporting WPA & WPA2 Networks
Accessories & Adapters	Compatible with Owl Labs Lock Adapter. Includes universal tripod screw mount on base.
Warranty	2-Year Limited Hardware Warranty

360° visibility

The Meeting Owl product line's panoramic lens provides a 360° view of the conference room so remote meeting attendees and students can see everyone in the room as if they were seated at the table instead of feeling like a fly on the wall. The Meeting Owl Pro's 1080p HD output resolution is 2X sharper than the original Meeting Owl for rooms with larger tables and a larger number of attendees.

360° sound

The Meeting Owl product line's 360° microphone array and speaker ensures that all meeting or class participants can be heard clearly, no matter where they're seated in relation to the Meeting Owl. The Meeting Owl Pro's 360° Smart Mics and tri-speaker make in-room sound and speaker pickup 2X clearer and louder, making it ideal for larger conference rooms and classrooms.

Intelligent technology

Powered by the Owl Intelligence System™ to use vision and voice to autoshift the camera to deliver a face-to-face meeting experience for remote and hybrid teams. Enabled for new features and tools over time to enhance virtual collaboration and productivity.
