Bringing hospitality together

# ChargePort Qi2 TA-8205

## Qi v2.0 certified wireless charger for hotel guest rooms.

### 15 Watt Charging with magnets

The new ChargePort Qi2 conforms to the new Qi v2.0 standard from the Wireless Power Consortium.

Supporting wireless charging up to 15 watts, the ChargePort Qi2 is compatible with phones that conform to both Magnetic Power Profile (MPP) or also Basic Power Profile (BPP).

### Folding Design

ChargePort Qi2 employs a unique folding design. When extended using an MPP phone allows 15W charging with the phone retained by magnets. If your phone does not support MPP then the ChargePort Qi2 can be folded flat to allow charging using the BPP profile.

### Hotel Security Features

The ChargePort Qi2 is ideal for hotel usage and comes complete with a USB cable, power supply, security bracket and adhesive pad.

### Specification

- Wireless Charging Output: 15 watts maximum using MPP. 5 watts using BPP.
- DC Input: Any Type-C PD charger supporting 5V/3A (15W) or 9V/2.22A (20W).
- Safety: Over Voltage Protection (OVP), Over Temperature Protection (OTP) and Foreign Object Detection (FOD).
- Certification: FCC and CE RED.
- Dimensions: 90.07 × 89.93 × 24.1mm.
